

# CHECK & OPTIMIZE

SWISS DISPENSING AG

SINCE 2014

This tailored offering provides you with the opportunity to enhance the efficiency of your production and identify weaknesses in your dispensing processes.

## Overview

- Price: CHF 600
- Duration: 2 hours
- Location: At your site

## Your benefits

Guided by an experienced specialist, you will take a tour in your production facility. We will analyze your dispensing processes and equipment, identify weak points directly on site and afterwards present you possibilities for optimization.

## Your advantages

- Important learnings in a short time
- Objective opinions on current challenges
- Identification of strengths and weaknesses of your dispensing processes
- Checking the correct use of your dispensing equipment
- Discussion about identified weaknesses
- Pointing out specific optimization possibilities

Did you know that choosing the wrong dispensing equipment or processes can cause high costs? With the "Check & Optimize" package, we can work together to identify savings opportunities. This investment will pay off immediately by reducing production defects and enhancing process capability.

## Questions & Appointment

Feel free to contact Bruno Thomann for more information or to schedule an appointment.
